What is this product?

Type

This is an investment fund established as a Company With Variable Capital (SICAV).

Objectives

Investment objective The objective of the Sub-Fund is to outperform the MSCI Europe Total Return Net Index reference index over a minimum recommended investment horizon of five years.

Investment policies To achieve this objective, the Sub-Fund will invest at least 75% of its asset in equity and securities similar to equity of any market and sector, mainly OECD issuers/markets. Up to 35% of total exposure may be invested in emerging market issuers/markets. Investments in China are foreseen, but will not exceed 10% of the Sub Fund's assets.

Equity selection is based on a rigorous process of fundamental company analysis, aiming at identifying companies the stock market valuation of which is not representative of the estimated intrinsic value, without constraints as to the capitalisation of the target companies. The portfolio can thus be exposed up to its totality in companies of small or average capitalisation (lower than a billion euros).

The portfolio shall be built up broadly of companies without taking into account the aforementioned index. Thus, the weight of each company in the portfolio is completely independent of the weight of this same company in the index, and it is possible that a company in the portfolio may not figure in the aforementioned index or that a well-ranked company within this index is excluded from the portfolio of the Sub-Fund. The Sub-Fund is not required to invest a percentage or the whole portfolio in securities that are constituents of the MSCI Europe Total Return Net. Moreover, depending on the market conditions, the investments could focus on just one country or a small number of countries and/or one economic sector of activity and/or currency.

The Sub-Fund may also invest in money market instruments, bonds and securities similar to bonds from the public or private sector (up to 25% of the assets), ranked as both "investment grade" and "non investment grade" with no limitations in terms of credit rating. UCITS ETF and other CIUs (up to 10% of the assets). CIUs will be eligible according to article 41 1) e. of the 2010 Act.

The Sub-Fund may hold ancillary liquid assets such as cash.

Benchmark The Sub-Fund is actively managed and its reference benchmark, the MSCI Europe Total Return Net Index, does not necessarily represent the investment universe or a constraint for the portfolio allocation of the Manager.

Redemption and Dealing This product is designed for longer term investments; you should be prepared to stay invested for at least 5 years. However, you can redeem your investment without penalty at any time during this period, or hold the investment longer.

Distribution Policy This Share Class does not pay dividends. Earned income is retained in the NAV.

Launch date The sub-fund was launched on 18/12/2015. The share class was launched on 18/12/2015.

Sub-fund Currency The reference currency of the Sub-Fund is EUR.

Switching between Funds Shareholders may switch all or part of their holdings into shares of another sub-fund provided they meet the minimum holding requirements of the destination Sub-Fund. Switching orders must be provided in writing. Full details of the switching process are given in the prospectus.

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Term

The Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the board of the Fund as set forth in the Fund prospectus, the Fund cannot be automatically terminated. The PRIIPs Manufacturer, Waystone Management Company (Lux) S.A., is not entitled to terminate the product unilaterally.

Practical information

Depository The fund depository is Pictet & Cie (Europe) S.A., 15 A Avenue J.-F. Kennedy, L-1855 Luxembourg.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 30 June 2017 and 30 June 2022.

Moderate: this type of scenario occurred for an investment between 28 February 2017 and 28 February 2022.

Favourable: this type of scenario occurred for an investment between 26 February 2021 and 27 February 2026.

What happens if Waystone Management Company (Lux) S.A. is unable to pay out?

The Management Company has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should the Fund default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

	If you exit after 1 year	If you exit after 5 years
Total Costs	233 EUR	1,248 EUR
Annual cost impact*	2.3%	2.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.6% before costs and 4.1% after costs.
